ANATOMY:-

S.I NO	ITEMS	ITEMS NAME	SPECIFICATION	QUANTITY
1		Different type of epithelia in selected organs	30"×40" Laminated & fitted with plastic Rollers	1
2		Microscopic illustration of the three types of muscles :skeletal, cardiac and smooth	30"×40" Laminated & fitted with plastic Rollers	1
3		The central nervous system is composed of the brain and spinal cord .A section of the brain and spinal card is illustrated here with their protective connective tissue layers called meninges (dura nmatter ,arachoid and pia mater)	20" ×26"	1
4		The peripheral nervous system is composed of the cranial and spinal nerves. A cross - section of the spinal cord is illustrated here with the characteristic features of the motor neuron and a cross-section of a peripheral nerve. Also illustrated are types of neurons located in different ganglia and organs outside of the central nervous system	20" ×26"	1
5		Comparison (transverse sections) of a muscular artery, large vein, and the three types of capillaries	20" ×26"	1
6		Location and distribution of the lymphoid organs and lymphatic channels in the body. Internal contents of the lymph node and spleen are illustrated in greater detail	20" ×26"	1
7		Salivary glands and their connections to the oral cavity, morphology of the tongue in cross - section, and added detail of a taste bud	20" ×26"	1
8		A sagittal section of the kidney showing the cortex and medulla, with blood vessels and the excretory ducts, including the pelvis and the ureter and a histologic comparison of the blood vessels, the different tubules of the nephron, and the collection ducts	20" ×26"	1
9		Hypothalamus and hypophysis (pituitary gland). A section of the hypothalamus and hypophysis illustrates the neuronal, axonal, and the vascular connections between these two organs. Also illustrated are the major target cells, tissues, and organs of the hormones that are produced by both the anterior and posterior pituitary gland (hypophysis)	20" ×26"	1
10		Location of testes and accessory male reproductive organs, with emphasis on the internal organization of the testis, different phases of the spermiogenesis, and structure of a mature sperm	20" ×26"	1
